RE: Remaining Reclamation Requirements, Geokinetics, Seep Ridge Project, M/047/002,
Uintah County, Utah

Geokinetics has completed most reclamation work at the Seep Ridge Mine, but there is still some reclamation work for which the Division needs to hold a bond. The site is adequately graded, and, except for the water wells, all facilities have been removed. The Division needs to continue to hold a bond for ripping and seeding the site and for reclamation of the two water wells. Whether these wells will be reclaimed or retained and transferred is unknown, but the Division should bond for reclamation.

Seep Ridge M/047/002
